Jose Torres/R6/USEPA/US@EPA

Mr. Torres,

We are appalled that TexCom is in the permit process for Class 1 injection wells to be located in South Montgomery County. We have read and informed ourselves of the problems and risks associated with the proposed site. A residential area is NOT a suitable site, nor is it acceptable to put injection wells in an area that could affect the water supply of 54 counties! It is an unstable area of hundreds of old oil wells - extremely accident prone!

We urge you to do your best to influence the TCEQ to NOT grant these permits to TexCom. TexCom has never done Class 1 injection wells.

Respectfully,

(b) (6)
